October 1, 2021

Dear Cincy Families,

The District had three students who has tested positive for COVID-19 this week. As a result, our two UPK classrooms and one kindergarten classroom were required to quarantine.

The county Health Department was the lead agency with all contact tracing and provides quarantine orders. They also took the lead role in any further steps that may be necessary, such as contact tracing and additional testing. In the event that you are contacted by a health department representative, we encourage you to offer your complete cooperation. Our role is to share contact information and we notify families that the County Health Department will be calling and issuing quarantine orders. We also remain in regular contact with each health department official regarding COVID-19 related issues.

I trust that you understand we can’t provide any additional information about these students due to confidentiality and privacy constraints. We have implemented numerous health and safety protocols throughout our school building to help prevent the spread of COVID-19.

Please continue to monitor your children as well as your family for symptoms and call Mrs. Potter or me if you have any questions.

Sincerely,

Todd M. Freeman
